

THE NATIONAL MEDAL OF SCIENCE

You have used your freedom to ask and answer some of the greatest questions of our time. Each of you has been a brilliant innovator, and more — breaking down barriers between disciplines, broadening the frontiers of knowledge, bringing the products of pure research into everyday lives of millions of people, helping to educate the next generation of inventors and innovators.....

For this, America and, indeed, the entire world is in your debt..... The work that you and your colleagues have done has changed everything about our lives. It has brought us to the threshold of a new scientific voyage that promises to change everything all over again.....

As our honorees receive their medals, we thank them for the way they have changed the way we view our planet and broadened infinitely the ways we gather and store knowledge. You are part of an unbroken chain from Lewis and Jefferson to Edison and Einstein; from the cotton gin to the space shuttle; from a vaccine for polio to the mysteries of DNA. I thank each of you for what you have done to change our world and to enrich our minds, our imaginations, and our hearts.

President William J. Clinton
National Medals of Science and Technology Awards Ceremony
The White House, March 14, 2000

PRESIDENT'S COMMITTEE ON THE NATIONAL MEDAL OF SCIENCE
NATIONAL SCIENCE FOUNDATION
4201 WILSON BOULEVARD
ARLINGTON, VIRGINIA 22230

Dear Colleague:

The President's Committee on the National Medal of Science is accepting nominations for the year 2001 Award.

The National Medal of Science was established by the 86th Congress in 1959 as a Presidential Award to be given to individuals "deserving of special recognition by reason of their outstanding contributions to knowledge in the physical, biological, mathematical, or engineering sciences." In 1980 Congress expanded this recognition to include the social and behavioral sciences. The Committee of 12 scientists and engineers is appointed by the President to evaluate the nominees for this Award.

Since its establishment, the National Medal of Science has been awarded to 374 distinguished scientists and engineers whose careers spanned decades of research and development. A list of the recipients from 1962 to the present appears elsewhere in this brochure. There are numerous younger American scientists and engineers, many of them women and minorities, now reaching the point where their contributions are worthy of recognition. The Committee asks for your assistance in identifying them.

The nomination procedures and guidelines, as well as instructions for submitting an electronic nomination, renomination, or support letter, are detailed in this brochure. Questions concerning the procedures or requests for additional nomination forms should be directed to the Committee's Program Manager, Mrs. Susan E. Fannoney, at the above address, or by telephone (703-306-1096). Please note that nominations and supporting information for the 2001 Awards must be postmarked by July 31, 2000.

The Committee greatly appreciates your assistance in this public recognition of the outstanding contributions of our Nation's leading scientists and engineers.

Sincerely yours,

Richard A. Zare
Chairman

I. CRITERIA

The Committee has established the following guidelines for selection of candidates.

- (a) The total impact of an individual's work on the present state of physical, biological, mathematical, engineering or social and behavioral sciences is to be the principal criterion.
- (b) Achievements of an unusually significant nature in relation to the potential effects of such achievements on the development of scientific thought.
- (c) Unusually distinguished service in the general advancement of science and engineering, when accompanied by substantial contributions to the content of science at some time.
- (d) Recognition by peers within the scientific community.
- (e) Contributions to innovation and industry.
- (f) Influence on education through publications, students, etc.
- (g) Must be a U.S. citizen or permanent resident who has applied for citizenship.

II. NOMINATION PROCEDURES AND DEADLINE FOR SUBMISSION

- (a) Nominations remain active for **four years**, including the year of nomination. After that time, candidates must be renominated with a new nomination package for them to be considered by the Committee.
- (b) Nomination forms are scanned by optical devices. Therefore, if the enclosed form or a facsimile is used, it must be single spaced typewritten using a font no smaller than 12 characters per inch.
- (c) Additional information on active nominations may be submitted via an updated nomination form, or letter submitted to the committee by the established deadline. Call (703) 306-1096 to request renomination of the candidate.
- (d) Nominations and renominations must be returned to the address shown on the nomination form and postmarked by July 31, 2000.

III. LETTERS OF SUPPORT FOR NOMINATIONS

- (a) Nominators are responsible for securing three letters supporting the candidate.
- (b) Letters may accompany the nomination form or be sent separately, but in any event must be postmarked by July 31, 2000.
- (c) Letters should only be mailed, faxed, or sent via the World Wide Web (WWW) electronic form (see Section IV). Email does not protect confidentiality and should not be used for this purpose.

IV. ELECTRONIC SUBMISSION OF NOMINATIONS

Nominations may be submitted electronically via the Internet. Using a World Wide Web (WWW) browser such as Netscape or MS Internet Explorer, access the electronic nomination system at location:

<http://www.fastlane.nsf.gov>

or access PDF or Word format at:

<http://www.nsf.gov/nsb/awards/medalofscience>

V. INQUIRIES:

NATIONAL MEDAL OF SCIENCE RECIPIENTS 1962-1999

1999

David Baltimore, California Institute of Technology

Felix E. Browder, Rutgers University, Piscataway, NJ

Ronald R. Coifman, Yale University

James W. Cronin, The Enrico Fermi Institute,
The University of Chicago

Jared Diamond, UCLA Medical School

Leo P. Kadanoff, The James Franck Institute,
The University of Chicago

Lynn Margulis, University of Massachusetts, Amherst

Stuart A. Rice, The James Franck Institute,
The University of Chicago

John Ross, Stanford University

Susan Solomon, National Oceanic and Atmospheric
Administration, Boulder

Robert M. Solow, Massachusetts Institute of Technology

Kenneth N. Stevens, Massachusetts Institute of
Technology

1998

Bruce N. Ames, University of California, Berkeley

Don L. Anderson, California Institute of Technology

John N. Bahcall, Institute for Advanced Study,
Princeton University

John W. Cahn, National Institute of Standards and
Technology

Cathleen Synge Morawetz, Courant Institute,
New York University

Janet D. Rowley, University of Chicago

Eli Ruckenstein, State University of New York at
Buffalo

George M. Whitesides, Harvard University

William Julius Wilson, John F. Kennedy School of
Government, Harvard University

1997

William K. Estes, Harvard University

Darleane C. Hoffman, University of California,
Berkeley Lawrence Berkeley Laboratory

Harold S. Johnston, University of California, Berkeley

Marshall N. Rosenbluth, University of California,
San Diego

Martin Schwarzschild*, Princeton University

James D. Watson, Cold Spring Harbor Laboratory

Robert A. Weinberg, Whitehead Institute for
Biomedical Research and Harvard University

George W. Wetherill, Carnegie Institution of
Washington

Shing-Tung Yau, Harvard University

1996

Wallace S. Broecker, Lamont-Doherty Earth
Observatory, Columbia University

Norman Davidson, California Institute of Technology

James L. Flanagan, Rutgers University

Richard M. Karp, University of California, Berkeley
and University of Washington

C. Kumar N. Patel, University of California, Los
Angeles

Ruth Patrick, Academy of Natural Sciences,
Philadelphia

Paul A. Samuelson, Massachusetts Institute
of Technology

Stephen Smale, University of California, Berkeley

1995

Thomas R. Cech, University of Colorado

Hans G. Dehmelt, University of Washington

Peter Goldreich, California Institute of Technology

Hermann A. Haus, Massachusetts Institute of
Technology

*Awarded Posthumously

Note: Institutions listed are those with which the recipients were affiliated at the time of the Award.

Isabella L. Karle, Naval Research Laboratory

Louis Nirenberg, Courant Institute, New York
University

Alexander Rich, Massachusetts Institute of
Technology

Roger N. Shepard, Stanford University

1994

Ray W. Clough, University of California, Berkeley

John Cocke, IBM T.J. Watson Research Center

Thomas Eisner, Cornell University

George S. Hammond, Bowling Green State University

Robert K. Merton, Columbia University and Russell
Sage Foundation

Elizabeth F. Neufeld, UCLA School of Medicine

Albert W. Overhauser, Purdue University

Frank Press, National Academy of Sciences

1993

Alfred Y. Cho, AT&T Bell Laboratories

Donald J. Cram, University of California, Los Angeles

Val L. Fitch, Princeton University

Norman Hackerman, The Robert A. Welch Foundation

Martin D. Kruskal, Rutgers University

Daniel Nathans, Johns Hopkins University

Vera C. Rubin, Carnegie Institution of Washington

Salome G. Waelsch, Albert Einstein College of
Medicine

1992

Eleanor J. Gibson, Cornell University

Allen Newell, Carnegie Mellon University

Calvin F. Quate, Stanford University

Eugene M. Shoemaker, U. S. Geological Survey

Howard E. Simmons, Jr., E. I. du Pont de Nemours

Maxine F. Singer, Carnegie Institution of Washington

Howard M. Temin, University of Wisconsin

John R. Whinnery, University of California, Berkeley

1991

Mary Ellen Avery, Harvard Medical School

Ronald Breslow, Columbia University

Alberto P. Calderon, The University of Chicago

Gertrude B. Elion, Burroughs Wellcome Company

George H. Heilmeyer, Bellcore

Dudley R. Herschbach, Harvard University

G. Evelyn Hutchinson*, Yale University

Elvin A. Kabat, Columbia University

Robert W. Kates, Brown University

Luna B. Leopold, University of California, Berkeley

Salvador E. Luria*, Massachusetts Institute of
Technology

Paul A. Marks, Memorial Sloan-Kettering Cancer
Center

George A. Miller, Princeton University

Arthur L. Schawlow, Stanford University

Glenn T. Seaborg, University of California, Berkeley

Folke K. Skoog, University of Wisconsin

H. Guyford Stever, Washington, DC

Edward C. Stone, California Institute of Technology

Steven Weinberg, The University of Texas at Austin

Paul C. Zamecnik, Worcester Foundation for
Experimental Biology

1990

Baruj Benacerraf, Harvard Medical School & Dana
Farber Cancer Institute

Elkan R. Blout, Harvard School of Public Health

Herbert W. Boyer, University of California, San
Francisco

George F. Carrier, Harvard University

Allan M. Cormack, Tufts University

Mildred S. Dresselhaus, Massachusetts Institute of
Technology

Karl Folkers, The University of Texas at Austin

Nick Holonyak, Jr., University of Illinois

Leonid Hurwicz, University of Minnesota

Stephen C. Kleene, University of Wisconsin

Daniel E. Koshland, Jr., University of California,
Berkeley

Edward B. Lewis, California Institute Of Technology

John McCarthy, Stanford University

Edwin M. McMillan, University of California,
Berkeley

David G. Nathan, The Children's Hospital, Harvard
Medical School

Robert V. Pound, Harvard University

Roger R.D. Revelle, Scripps Institution of
Oceanography

John D. Roberts, California Institute of Technology

Patrick Suppes, Stanford University

E. Donnell Thomas, Fred Hutchinson Cancer
Research Center

1989

Arnold O. Beckman, California Institute of
Technology

Richard B. Bernstein, University of California,
Los Angeles

Melvin Calvin, University of California, Berkeley

Harry G. Drickamer, University of Illinois

Katherine Esau, University of California, Santa
Barbara

Herbert E. Grier, CER Corporation

Viktor Hamburger, Washington University

Samuel Karlin, Stanford University

Philip Leder, Harvard Medical School

Joshua Lederberg, The Rockefeller University

Saunders Mac Lane, The University of Chicago

Rudolph A. Marcus, California Institute of Technology

Harden M. McConnell, Stanford University

Eugene N. Parker, The University of Chicago

Robert P. Sharp, California Institute of Technology

Donald C. Spencer, Princeton University

Roger W. Sperry, California Institute of Technology

Henry M. Stommel, Woods Hole Oceanographic
Institution

Harland G. Wood, Case Western Reserve University

1988

William O. Baker, AT&T Bell Labs

Konrad E. Bloch, Harvard University

D. Allan Bromley, Yale University

Michael S. Brown, University of Texas Southwestern
Medical Center

Paul C. W. Chu, University of Houston

Stanley N. Cohen, Stanford University School of
Medicine

Elias J. Corey, Harvard University

Daniel C. Drucker, University of Florida

Milton Friedman, The Hoover Institution,
Stanford University

Joseph L. Goldstein, University of Texas Southwestern
Medical Center

Ralph E. Gomory, IBM Corporation

Willis M. Hawkins, Lockheed Corporation

Maurice R. Hilleman, Merck Institute for
Therapeutic Research

George W. Housner, California Institute of Technology

Eric R. Kandel, Howard Hughes Medical Institute,
Columbia University

Joseph B. Keller, Stanford University

Walter Kohn, University of California, Santa Barbara

Norman F. Ramsey, Jr., Harvard University

Jack Steinberger, European Center for Nuclear
Research

Rosalyn S. Yalow, VA Hospital, Bronx, NY

1987

Phillip H. Abelson, American Association for the
Advancement of Science

Anne Anastasi, Fordham University

Robert Byron Bird, University of Wisconsin

Raoul Bott, Harvard University

Michael E. DeBakey, Baylor College of Medicine

Theodor O. Diener, U. S. Department of Agriculture

Harry Eagle, Albert Einstein College of Medicine

Walter M. Elsasser, Johns Hopkins University

Michael H. Freedman, University of California,
San Diego

William S. Johnson, Stanford University

Har Gobind Khorana, Massachusetts Institute of
Technology

Paul C. Lauterbur, University of Illinois

Rita Levi-Montalcini, Italian National Research
Council

George E. Pake, Xerox Corporation

H. Bolton Seed, University of California, Berkeley

PRIVACY ACT AND PUBLIC BURDEN STATEMENTS

The information requested on the application materials is solicited under the authority of the National Science Foundation Act of 1950, as amended. It will be used in connection with the selection of qualified applicants and may be disclosed to qualified reviewers and staff assistants as part of the review process; to government contractors as necessary to complete assigned work; and to another Federal agency, court or party in a court or Federal administrative proceeding if the government is a party. Notice of the decision may be given to nominators, and disclosure may be made of awardees' names, home institutions, and field of study for public information/affairs purposes including press releases. Biographical and background information from publicly available sources may also be used for this purpose. See Systems of Records, NSF-12, "Fellowships and Other Awards," 63 Federal Register 265 (January 5, 1998). Submission of the information is voluntary; however, failure to provide full and complete information may reduce the possibility of receiving an award.

The public reporting burden for this collection of information is estimated to average 10 hours per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden to:

Suzanne Plimpton
